UNITED STATES INTELLIGENCE BOARD

OFFICE OF THE EXECUTIVE SECRETARY

25X1A

Copy No. 1 of 8

[Redacted]
9 November 1967

MEMORANDUM FOR CHAIRMAN, COMMITTEE ON IMAGERY
REQUIREMENTS AND EXPLOITATION

SUBJECT : Mapping, Charting and Geodesy Requirements
for Image Forming Satellites

REFERENCE : USIB-D-46.8/25 (COMIREX-D-15.2/3),
8 November 1967, Limited Distribution

1. In the executive session at the 9 November 1967 United States Intelligence Board (USIB) meeting, General Carroll stated that there was an urgent need for USIB guidance on the subject in response to the letter from the Director of the National Reconnaissance Office (NRO) in the reference. General Carroll said that he understood certain contractual provisions related to this project required that the Director, NRO, receive the Board's response before 1 December.

2. For this reason I was asked to inform you that the reference letter from the Director, NRO, to the Director of Central Intelligence, which was referred to COMIREX on 8 November for study and recommendations to the USIB should be treated as urgent so that a response could be considered by the Board and forwarded to NRO before 1 December 1967.
